PROFILE

Software Engineer focused on building solutions that connect and empower people. Over 2 years of experience developing backend systems, APIs, and data workflows, including health system integrations and laboratory analytics for Zanzibar's national laboratory information system.

EXPERIENCE

Software Engineer

Ubunifu Solutions Limited

August 2024 – Present

- Built ZanLIS middleware with REST APIs, duplicate prevention, automatic retries, and a transactional outbox. ZanLIS was deployed at 12 laboratory sites in Zanzibar as of September 2026.
- Built ETL pipelines, a ClickHouse data warehouse, and Apache Superset dashboards to track laboratory activity, results, and turnaround times.
- Led unit, integration, and system testing; worked with Ministry of Health stakeholders on requirements, deployment, training, and troubleshooting.

Software Engineer

Dproz

April 2024 – August 2024

- Performed exploratory testing and documented defects for the development team.
- Presented product demonstrations and onboarded users, helping them understand and use the platform.
- Followed up with users after onboarding and relayed feedback and reported issues to the team.
